CONTENTS OF VOLUME 32

The 2002 Wald Memorial Lectures

BREIMAN, LEO. Population theory for boosting ensembles 1–11

Articles

ABRAHAM, CHRISTOPHE AND CADRE, BENOÎT. Asymptotic global robustness in Bayesian decision theory 1341–1366

AERTS, MARC, CLAESKENS, GERDA AND HART, JEFFREY D. Bayesian-motivated tests of function fit and their asymptotic frequentist properties 2580–2615

AÏT-SAHALIA, YACINE AND MYKLAND, PER A. Estimators of diffusions with randomly spaced discrete observations: A general theory 2186–2222

BAILEY, R. A. AND DRUILHET, P. Optimality of neighbor-balanced designs for total effects 1650–1661

BARAUD, YANNICK. Confidence balls in Gaussian regression 528–551

BARBIERI, MARIA MADDALENA AND BERGER, JAMES O. Optimal predictive model selection 870–897

BARMI, HAMMOU EL AND MUKERJEE, HARI. Consistent estimation of distributions with type II bias with applications in competing risks problems 245–267

BARTLETT, PETER L., JORDAN, MICHAEL I. AND MCAULIFFE, JON D. Discussion of boosting papers 85–91

BERAN, RUDOLF. Hybrid shrinkage estimators using penalty bases for the ordinal one-way layout 2532–2558

BERGER, JAMES O. AND BARBIERI, MARIA MADDALENA. Optimal predictive model selection 870–897

BERGER, JAMES O. AND PERICCHI, LUIS R. Training samples in objective Bayesian model selection 841–869

BERKES, ISTVÁN AND HORVÁTH, LAJOS. The efficiency of the estimators of the parameters in GARCH processes 633–655

BICKEL, PETER J. AND RITOV, YA'ACOV. Discussion of boosting papers 91–96

BROWN, LAWRENCE D., CARTER, ANDREW V., LOW, MARK G. AND ZHANG, CUN-HUI. Equivalence theory for density estimation, Poisson processes and Gaussian white noise with drift 2074–2097

BROWN, LAWRENCE D. AND LIN, YI. Statistical properties of the method of regularization with periodic Gaussian reproducing kernel 1723–1743

BÜHLMANN, PETER AND YU, BIN. Discussion of boosting papers 96–101

BULUTOGLU, DURSUN A. AND CHENG, CHING-SHUI. Construction of $E(s^2)$-optimal supersaturated designs 1662–1678

BUNEA, FLORENTINA. Consistent covariate selection and post model selection inference in semiparametric regression 898–927
BUTLER, RONALD W. AND WOOD, ANDREW T. A. Saddlepoint approximation for moment generating functions of truncated random variables 2712–2730
CADRE, BENOÎT AND ABRAHAM, CHRISTOPHE. Asymptotic global robustness in Bayesian decision theory 1341–1366
CAI, T. TONY AND LOW, MARK G. Minimax estimation of linear functionals over nonconvex parameter spaces 552–576
CAI, T. TONY AND LOW, MARK G. An adaptation theory for nonparametric confidence intervals 1805–1840
CARTER, ANDREW V., LOW, MARK G., ZHANG, CUN-HUI AND BROWN, LAWRENCE D. Equivalence theory for density estimation, Poisson processes and Gaussian white noise with drift 2074–2097
CARTER, ANDREW AND POLLARD, DAVID. Tusnády's inequality revisited 2731–2741
CATOR, ERIC A. On the testability of the CAR assumption 1957–1980
CHAN, GRACE AND WOOD, ANDREW T. A. Estimation of fractal dimension for a class of non-Gaussian stationary processes and fields 1222–1260
CHEN, KANI. Statistical estimation in the proportional hazards model with risk set sampling 1513–1532
CHENG, CHING-SHUI AND BULUTOGLU, DURSUN A. Construction of $E(s^2)$-optimal supersaturated designs 1662–1678
CHENG, SHAO-WEI AND YE, KENNY Q. Geometric isomorphism and minimum aberration for factorial designs with quantitative factors 2168–2185
CHOPIN, NICOLAS. Central limit theorem for sequential Monte Carlo methods and its application to Bayesian inference 2385–2411
CLAESKENS, GERDA, HART, JEFFREY D. AND AERTS, MARC. Bayesian-motivated tests of function fit and their asymptotic frequentist properties 2580–2615
COOK, R. DENNIS. Testing predictor contributions in sufficient dimension reduction 1062–1092
COOK, R. DENNIS AND LI, BING. Determining the dimension of iterative Hessian transformation 2501–2531
COPAS, JOHN B. AND LU, GUOBING. Missing at random, likelihood ignorability and model completeness 754–765
CUI, HENGJIAN, HE, XUMING AND ZUO, YIJUN. On the Stahel–Donoho estimator and depth-weighted means of multivariate data 167–188

CUI, HENGJIAN, YOUNG, DENNIS AND ZUO, YIJUN. Influence function and maximum bias of projection depth based estimators 189–218

DAS, KALYAN, JIANG, JIMING AND RAO, J. N. K. Mean squared error of empirical predictor 818–840

DAVIES, P. LAURIE AND KOVAC, ARNE. Densities, spectral densities and modality 1093–1136

DAWID, A. PHILIP AND GRÜNWALD, PETER D. Game theory, maximum entropy, minimum discrepancy and robust Bayesian decision theory 1367–1433

DETTE, HOLGER, MELAS, VIATCHESLAV B. AND PEPELYSHEV, ANDREY. Optimal designs for a class of nonlinear regression models 2142–2167

DONOHO, DAVID AND JIN, JIASHUN. Higher criticism for detecting sparse heterogeneous mixtures 962–994

DOUC, RANDAL, MOULINES, ÉRIC AND RYDÉN, TOBIAS. Asymptotic properties of the maximum likelihood estimator in autoregressive models with Markov regime 2254–2304

DRUILHET, P. AND BAILEY, R. A. Optimality of neighbor-balanced designs for total effects 1650–1661

EFROMOVICH, SAM. Density estimation for biased data 1137–1161

EFRON, BRADLEY, HASTIE, TREVOR, JOHNSTONE, IAIN AND TIBSHIRANI, ROBERT. Least angle regression 407–451

EFRON, BRADLEY, HASTIE, TREVOR, JOHNSTONE, IAIN AND TIBSHIRANI, ROBERT. Rejoinder 494–499

EMOND, MARY, WELLNER, JON A. AND NAN, BIN. Information bounds for Cox regression models with missing data 723–753

FAN, JIANQING AND PENG, HENG. Nonconcave penalized likelihood with a diverging number of parameters 928–961

FAN, JIANQING AND ZHANG, JIAN. Sieve empirical likelihood ratio tests for nonparametric functions 1858–1907

FINE, JASON P., KOSOROK, MICHAEL R. AND LEE, BEE LENG. Robust inference for univariate proportional hazards frailty regression models 1448–1491

FREUND, YOAV, MANSOUR, YISHAY AND SCHAPIRE, ROBERT E. Generalization bounds for averaged classifiers 1698–1722

FREUND, YOAV AND SCHAPIRE, ROBERT E. Discussion of boosting papers 113–117

FRIEDMAN, JEROME, HASTIE, TREVOR, ROSSET, SAHARON, TIBSHIRANI, ROBERT AND ZHU, JI. Discussion of boosting papers 102–107

FUH, CHENG-DER. Asymptotic operating characteristics of an optimal change point detection in hidden Markov models 2305–2339
GENOVESE, CHRISTOPHER AND WASSERMAN, LARRY. A stochastic process approach to false discovery control 1035–1061
GIGLIO, BEATRICE AND WYNN, HENRY P. Monomial ideals and the Scarf complex for coherent systems in reliability theory 1289–1311
GOBET, EMMANUEL, HOFFMANN, MARC AND REIß, MARKUS. Nonparametric estimation of scalar diffusions based on low frequency data 2223–2253
GOLDENSHLUGER, ALEXANDER AND ZEEVI, ASSAF. The Hough transform estimator 1908–1932
GRÜNWALD, PETER D. AND DAWID, A. PHILIP. Game theory, maximum entropy, minimum discrepancy and robust Bayesian decision theory 1367–1433
HALL, PETER, MINNOTTE, MICHAEL C. AND ZHANG, CHUNMING. Bump hunting with non-Gaussian kernels 2124–2141
HALL, PETER AND OOI, HONG. Attributing a probability to the shape of a probability density 2098–2123
HALL, PETER AND PENEV, SPIRIDON. Wavelet-based estimation with multiple sampling rates 1933–1956
HALLIN, MARC, LU, ZUDI AND TRAN, LANH T. Local linear spatial regression 2469–2500
HALLIN, MARC AND PAINDAVEINE, DAVY. Rank-based optimal tests of the adequacy of an elliptic VARMA model 2642–2678
HAN, DONG AND TSUNG, FUGEE. A generalized EWMA control chart and its comparison with the optimal EWMA, CUSUM and GLR schemes 316–339
HART, JEFFREY D., AERTS, MARC AND CLAESKENS, GERDA. Bayesian-motivated tests of function fit and their asymptotic frequentist properties 2580–2615
HASTIE, TREVOR, JOHNSTONE, IAIN, TIBSHIRANI, ROBERT AND EFRON, BRADLEY. Least angle regression 407–451
HASTIE, TREVOR, JOHNSTONE, IAIN, TIBSHIRANI, ROBERT AND EFRON, BRADLEY. Rejoinder 494–499
HASTIE, TREVOR, ROSSET, SAHARON, TIBSHIRANI, ROBERT, ZHU, JI AND FRIEDMAN, JEROME. Discussion of boosting papers 102–107
HE, XUMING, ZUO, YIJUN AND CUI, HENGJIAN. On the Stahel–Donoho estimator and depth-weighted means of multivariate data 167–188

HENNIG, CHRISTIAN. Breakdown points for maximum likelihood estimators of location–scale mixtures 1313–1340
HOBERT, JAMES P. AND JONES, GALIN L. Sufficient burn-in for Gibbs samplers for a hierarchical random effects model 784–817
HOFFMANN, MARC, REIß, MARKUS AND GOBET, EMMANUEL. Nonparametric estimation of scalar diffusions based on low frequency data 2223–2253
HOROWITZ, JOEL L. AND MAMMEN, ENNO. Nonparametric estimation of an additive model with a link function 2412–2443
HORVÁTH, LAJOS AND BERKES, ISTVÁN. The efficiency of the estimators of the parameters in GARCH processes 633–655
HU, FEIFANG AND ZHANG, LI-XIN. Asymptotic properties of doubly adaptive biased coin designs for multitreatment clinical trials 268–301
HUANG, TZEE-MING. Convergence rates for posterior distributions and adaptive estimation 1556–1593
HUNTER, DAVID R. MM algorithms for generalized Bradley–Terry models 384–406
ING, CHING-KANG. Selecting optimal multistep predictors for autoregressive processes of unknown order 693–722
ISHWARAN, HEMANT. Discussion 452–458
JENSEN, SØREN TOLVER AND MADSEN, JESPER. Estimation of proportional covariances in the presence of certain linear restrictions 219–232
JIANG, JIMING, RAO, J. N. K. AND DAS, KALYAN. Mean squared error of empirical predictor 818–840
JIANG, WENXIN. Process consistency for AdaBoost 13–29
JIANG, WENXIN. Rejoinder 117–124
JIN, JIASHUN AND DONOHO, DAVID. Higher criticism for detecting sparse heterogeneous mixtures 962–994
JING, BING-YI, SHAO, QI-MAN AND ZHOU, WANG. Saddlepoint approximation for Student's t-statistic with no moment conditions 2679–2711
